

We would urge you not to do anything that would lessen Indiana's Telephone Privacy law protection. The Indiana Telephone Privacy Act has improved the unwanted calls that we use to receive and made our evenings so much more pleasant. After busy days our home is our haven and it is so nice not to be receiving unsolicited calls now. If I want to shop or order something I will go out and shop or order what I want I don't need telemarketers calling to interrupt what time I have at home. Thank you and please keep this telephone privacy protection in service.
